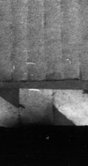
Simplicity Should Keynote Entertainment, Says Expert

Hostess Should Express Individuality in Table Settings

By Edwina Nolan
Popular Authority on Home Economics

SUMMER time is party time—impromptu parties, when friends drop in casually or newly-wed, also invitation parties which may be as informal or as elaborate as you choose. The secret of success, however, is not to make hard work of hospitality—let simplicity be your keynote.

Select your parties according to tastes. Invite people who like to play old-fashioned games—their number is greater than they themselves imagine, if once they can be started. Another evening, have bridge players. On another ask those who like to talk seriously; and on another, invite those who like to turn on the radio and dance. It's really very simple; always have a plan for entertainment of your guests — a flexible plan which will serve as an impetus to keep your party going and still allow people to follow their own inclinations to a degree.



Edwina Nolan

Food is an important part of any party. Here time spent in careful planning will pay dividends. Use your imagination—food should have style and beauty. It must please the eye as well as the appetite. Emphasize contrasts in flavor, texture and color—have foods both hot and cold. Yes, one hot course is desirable even in the warmest weather. If good digestion is to wait on appetite and good health or both, we must not change our diet too radically from hot foods to all cold foods, so serve a hot soup, vegetable, bread or maybe a hot fish or meat dish. Accent your bland foods with a bit of something crisp and sharp. Garnish carefully with a nice eye for color, but don't be too lavish and smother things under a blanket of parsley—pimiento—sliced egg, radish roses, cucumber rings or stuffed olives.

In choosing the refreshments you will serve, it is well to decide on foods which can be prepared before the party and which will need a minimum of last minute preparation. Your electric refrigerator will prove to be your right hand maiden—they will be returned to their homes by 12 each day.

This Year's June Bride is Luckiest of All

By Constance Hart

Modern Science Has Brought New Ease of Living With Host of Aids That Contribute to Health and Freedom

SHOW me the June bride who isn't dreaming about a bright new home and a husband who will love her forever!

The nicest part of dreaming today, is that you *can* make your dreams come true. You *can* have that lovely home. You *can* keep yourself gay and charming, so that your husband will always adore you!

Science Contributes

Never did science contribute so much to happiness as it does this very day. Beggaring Aladdin's genii, it stands ready to aid in a thousand and one ways, every minute of the day.

I don't think I have to tell you how hard housework used to be, mother knows. She wrestled with coal fires in winter months. She labored over wash tubs and ironing board. She grew tired and weary, in a big old-fashioned kitchen that took her strength and robbed her of her beauty.

But 1936 June brides can keep young for years to come. They have at their fingertips numerous electrical servants that work at an instant's notice—that never tire, never go on strike, and never complain!

So I suggest you plan your new home carefully. See that it has adequate wiring, and all the outlets you will need. Make provision for an automatic oil or gas furnace. Consider the "comforts of air-conditioning. And do, I beg you, budget your income to include an electric kitchen and laundry!

You know how wise it is to plan for those things now—at the *start* of life's most exciting adventure! For surely you don't want to turn your June bride beauty into July drudgery. Surely you don't want to lose the very things your husband loves you for—freshness, youth, companionship and a readiness for fun.

You know how speedily electrical servants work. An electric ironer turns out men's shirts in four minutes flat, without a wrinkle or crease—as perfect, in fact, as the custom laundry does it. And if you've ever seen an electric dishwasher work, you know how housework's most beauty-robbing task becomes a pleasant, speedy job—how dishes gleam with undreamed of brightness! You know, too, how carefully modern kitchens are planned, to save steps and make more work!

And here's a suggestion you both might follow—for the valuable aid it will prove in planning your home. There's a "New American" Demonstration Home somewhere in your community. Be sure to see it! It is truly a "house that works," for it's planned from the inside out, to insure the best possible working and living arrangements. In this home you'll see a whole array of electric servants . . . a kitchen that will thrill you to your toes—a laundry that is the very last word, and a heating system that's simple, economical and highly efficient! This home will open your eyes to a whole new pattern of living. See it, before you build your own! Then plan for one like it.

Once she had charm—and her laughter rang out clear and bell-like at her parties.

There was a fascination about her that warmed the very circle in which she stood.

Then in the foolishness of youth—she began to drink. Oh, not much, a little, and then a little more. But quite regularly. It became a sort of social habit.

Within her, the poisonous alcohol gradually brought about a transformation which reflected itself in her features.

The soft, fresh loveliness has gone . . . the creamy tints of the skin have been robbed of their color . . . leaving a drab whiteness, unattractive to men.

The firm, smooth face has lost the elasticity that nature gave it, and a sallow hue has set in.

The eyes have lost their lustre . . . have taken on a glossy hardness that all light seems to have gone.

All the beauty shops in the world cannot erase the marks of dissipation, nor can gradual, relentless process.

Alcohol is a slow poison that destroys

TEAM UP with the million and more who make the "American" Party one of the biggest of its kind in the country. Its members may not have the same slant on politics--but they all pledge loyalty to "American."

For the "American" Party is made up of motorists who vote for the American Oil Company's Amoco-Gas and Orange American Gas at The Sign of Greater Values from Maine to Florida.

Amoco-Gas began its career as the original candidate in the special motor fuel field. That was 21 years ago and each succeeding year has won and held the votes of new users. Amoco's history has been all performance--not just promise.

If you want to "look at the record" ask the American Automobile Association, and learn that Amoco-Gas holds more official A.A.A. world's records than any other gas or motor fuel. Amoco-Gas will take you further--smoother--and for less. It costs a bit more per gallon at the pump--is worth much more--does more.

Or if you're a "regular" party voter, there's Orange American Gas--the "regular" party leader for years, and the best at regular price. Made from a pure petroleum base, it has no added chemicals, leaves no harmful deposits. These features and American's new refinery methods give Orange American Gas a new action that is getting action everywhere.

Join the great "American" Party yourself! Vote at The Sign of Greater Values--from Maine to Florida and inland!
